

OH3 - Store, Compact Storage and Rack Store

(Shopping Centers)

Features:

- Unique patented design with high performance for cooling effect and low consumption of water.
- Easy to install and test for both commissioning and maintenance.
- 603 nozzle body is supplied with threaded M20.
- Nozzle tools and spares are available for maintenance.
- Working pressure – 100 bar.
- Ultra Fog is the only company that can test the nozzle without breaking the frangible glass bulb.
- VdS Schadenverhütung Draft Fire test Store OH3, Standard EN 12845, CAE 4001
- Fire test report reference number: SWRI 01.16351.07.010

Technical Data

Settings	Nozzle Type	Spacing (C-C)	Ceiling Height	Covering Area	Mounting	K Value (K=)	Flow Rate
Compact storage	603-260-160-B	3,5m *	5m	13m ²	Ceiling	4,2	Flow at 100 bar 42 L/minute
Rack store	603-260-230-B	3,5m *	5m	13m ²	Ceiling	4,9	Flow at 100 bar 49 L/minute

* The distance from the wall is about ½ of the spacing, if the room is up to 13m² the nozzle will be placed in the centre of the room.
